Evidence

AI signals (6)

Built with Lovable, an AI website/app generator
Fingerprints of Lovable were found. Sites made with this tool are generated from text prompts, so the layout, code and usually the copy are AI-produced.

AI-generated image: IPTC DigitalSourceType = trainedAlgorithmicMedia (declared fully AI-generated)
Found in the file metadata of www.hauntseek.co.uk/assets/hero-corridor-CdLUZFL-.jpg. Metadata is written by the generating tool and is strong evidence (it can be stripped, but rarely forged).

AI-generated image: IPTC DigitalSourceType = trainedAlgorithmicMedia (declared fully AI-generated)
Found in the file metadata of www.hauntseek.co.uk/assets/evidence-scanner-feature-1Or5savh.jpg. Metadata is written by the generating tool and is strong evidence (it can be stripped, but rarely forged).

React + Tailwind + shadcn + Lucide stack (default output of most AI code generators)
1547 occurrences found in the page HTML.

Matches the default stack of AI app generators
Found React/Vite SPA, Tailwind, Radix/shadcn, Lucide icons, Sonner toasts. This exact combination is what Lovable, Bolt, v0 and similar tools output by default. Human developers use it too, so it is supporting evidence only.

High em-dash usage (81 em-dashes, 6 per 1,000 words)
LLMs use the "—" character far more often than people typing on a keyboard.

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
