All 17 checks passed.

Speed and page weight A 94/100

Response	HTML size	Scripts	Images	Other domains
455 ms	106 KB	3	13	0

- **Image dimensions** — 1 image has no width and height, which makes the layout shift as they load.

9 other checks passed.

Security Grade B 87/100

- **Content Security Policy** — No Content-Security-Policy. It is the main defence against injected scripts (XSS).
- **Clickjacking protection** — Any site can show this page inside a frame (no X-Frame-Options or frame-ancestors).
- **Permissions policy** — No Permissions-Policy header.
- **security.txt** — No /.well-known/security.txt telling researchers how to report problems.

Evidence

AI signals (3)

Built with Lovable, an AI website/app generator
Fingerprints of Lovable were found. Sites made with this tool are generated from text prompts, so the layout, code and usually the copy are AI-produced.

React + Tailwind + shadcn + Lucide stack (default output of most AI code generators)
378 occurrences found in the page HTML.

Matches the default stack of AI app generators
Found React/Vite SPA, Tailwind, Radix/shadcn, Lucide icons, Sonner toasts. This exact combination is what Lovable, Bolt, v0 and similar tools output by default. Human developers use it too, so it is supporting evidence only.

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
