Text that only appears when AI output is pasted without editing (assistant phrases or [bracketed] placeholders).

React + Tailwind + shadcn + Lucide stack (default output of most AI code generators)
2679 occurrences found in the page HTML.

Matches the default stack of AI app generators

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
