Why this score

Raised the AI score

Nothing pointed to AI.

Lowered the AI score

-15 **Legacy hand-written markup (tables for layout, <font>,)**

-6 **Domain registered in 2000**

Platform / Builder	0%
Code & Design	0%
Written Content	0%
Images	0%

SEO audit

40/100

- **HTTPS** — The page is not served over HTTPS. Browsers mark it "Not secure" and search engines prefer HTTPS.
- **Meta description** — No meta description. Search engines will pick text from the page instead.
- **Main heading (H1)** — No H1 heading. Each page should have one main heading.
- **Mobile friendly viewport** — No viewport tag, so phones show a zoomed-out desktop page.
- **Social sharing tags** — No Open Graph tags. Shared links show no picture or summary.

- **Page title** 16 characters. Aim for 30 to 60 so the title says more in search results.
- **Canonical URL** No canonical link. It helps search engines pick the main version of a page.
- **robots.txt** No robots.txt file.
- **XML sitemap** No sitemap found at /sitemap.xml or in robots.txt.
- **Language** The page does not declare its language (html lang).
- **Structured data** No JSON-LD structured data. It can earn rich results in search.
- **Content on the page** 94 words. Pages with more useful text tend to rank better.

2 other checks passed.

Speed and page weight

A 96/100

Response	HTML size	Scripts	Images	Other domains
136 ms	4 KB	0	0	0

- **HTTP/2 or newer** Served over HTTP/1.1. HTTP/2 loads many files at once over one connection.

7 other checks passed.

Security

Grade F 31/100

- **HTTPS** The site is not served over HTTPS, so anything sent to it can be read or changed in transit.
- **Content Security Policy** No Content-Security-Policy. It is the main defence against injected scripts (XSS).
- **Clickjacking protection** Any site can show this page inside a frame (no X-Frame-Options or frame-ancestors).
- **MIME sniffing** No X-Content-Type-Options: nosniff header.
- **Referrer policy** No Referrer-Policy header.
- **Permissions policy** No Permissions-Policy header.
- **Software versions hidden** Headers reveal exact versions (server: nginx/1.31.8), which helps attackers find known weaknesses.
- **security.txt** No /.well-known/security.txt telling researchers how to report problems.
- **DNSSEC** DNS records are not signed (DNSSEC off), so they can be spoofed.

Privacy and trackers

Low tracking

0 found	No advertising pixels, session recorders or mainstream analytics were found.
Privacy policy	Not found
Cookie consent tool	Not found
Cookies set by the server	None on the first visit

Accessibility

B 82/100

- **Page language** No lang attribute, so screen readers may read the page in the wrong accent.
- **Page landmarks** No <main> region, so keyboard and screen-reader users can't jump to the content.

5 other checks passed.

Content

Words	Reading time
94	1 min

Domain and hosting

Domain age	26 years (Registered Feb 17, 2000)
Registrar	Dynadot Inc
Expires	Dec 8, 2034
Server IP	199.250.222.56
DNS hosted by	a.auth-ns.sonic.net, b.auth-ns.sonic.net, c.auth-ns.sonic.net
Email	Own mail server
Email protection	SPF present, DMARC missing, DKIM missing

Evidence

Human signals (2)

Legacy hand-written markup (tables for layout, <font>,)
2 occurrences found in the page HTML.

Domain registered in 2000
The domain predates mainstream AI website generators, so the site has likely existed (in some form) before AI tools. It may still have been rebuilt with AI since.

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
