Evidence

Human signals (1)

Domain registered in 2018

The domain predates mainstream AI website generators, so the site has likely existed (in some form) before AI tools. It may still have been rebuilt with AI since.

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
