SEO audit

94/100

- **Page title** — 160 characters. Search engines usually cut titles off after about 60.
- **Social sharing tags** — Open Graph tags are incomplete (title or image missing).

15 other checks passed.

Speed and page weight

C 76/100

Response	HTML size	Scripts	Images	Other domains
499 ms	118 KB	29	11	8

- **Render-blocking scripts** — 2 scripts in the head load without async or defer and delay the first paint.
- **Number of scripts** — 29 external scripts. Each one costs a download and CPU time on phones.
- **Third-party services** — Loads files from 8 other domains. Each one needs its own connection.
- **Image dimensions** — 1 image has no width and height, which makes the layout shift as they load.
- **Modern image formats** — 11 images are JPEG, PNG or GIF. WebP or AVIF are usually 25 to 50% smaller.
- **HTTP/2 or newer** — Served over HTTP/1.1. HTTP/2 loads many files at once over one connection.

5 other checks passed.

Security

Grade C 73/100

- **HSTS** — No Strict-Transport-Security header, so a first visit over plain HTTP can be intercepted.
- **Content Security Policy** — No Content-Security-Policy. It is the main defence against injected scripts (XSS).
- **Clickjacking protection** — Any site can show this page inside a frame (no X-Frame-Options or frame-ancestors).
- **MIME sniffing** — No X-Content-Type-Options: nosniff header.
- **Referrer policy** — No Referrer-Policy header.
- **Permissions policy** — No Permissions-Policy header.
- **Software versions hidden** — Headers reveal exact versions (server: nginx/1.24.0 (Ubuntu)), which helps attackers find known weaknesses.
- **Cookie flags** — 2 of 2 cookies are missing Secure, HttpOnly or SameSite.
- **security.txt** — No /.well-known/security.txt telling researchers how to report problems.
- **DNSSEC** — DNS records are not signed (DNSSEC off), so they can be spoofed.

3 other checks passed.

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
