SEO audit

81/100

- **Main heading (H1)** — No H1 heading. Each page should have one main heading.
- **Page title** — 91 characters. Search engines usually cut titles off after about 60.
- **Meta description** — 213 characters. Descriptions longer than about 160 are cut off.

- **Social sharing tags** Open Graph tags are incomplete (title or image missing).
- **Favicon** No icon declared in the page head.

11 other checks passed.

Security

Grade A 100/100

All 10 checks passed.

Evidence

AI signals (1)

High em-dash usage (62 em-dashes, 27.9 per 1,000 words)
LLMs use the "—" character far more often than people typing on a keyboard.

Human signals (1)

Domain registered in 2005
The domain predates mainstream AI website generators, so the site has likely existed (in some form) before AI tools. It may still have been rebuilt with AI since.

About this result

AI detection is probabilistic. This report is based on signals the site exposes publicly (code, metadata, text patterns, images). It cannot see a site's development history, and well-edited AI work can look human-made. Use the result as an indication, not proof.
